Abstract

The invention relates to a vehicle sensor (4) for detecting impact sound, said sensor comprising a measured-value sensor (4.1) for detecting the impact sound. The measured-value sensor (4.1) comprises several individual, separate measured-value sensing elements (4.1.x), each of which is coupled to a vehicle structure (5) in such a way that impact sound waves are transmitted by the vehicle structure (5) to the measured-value sensing elements (4.1.x).
